ABOUT ME

I am a FrontEnd Developer interested in building usable, useful, well-constructed websites and web apps using Angular and React. My goal is to become associated with an organization where I can utilize my skills and gain further experience while enhancing the company productivity and reputation.

EXPERIENCE

Angular Developer - *Sixlogs Technologies, Karachi*

June 2022 - April 2024

- Create and setup a project from scratch, customize theme, design and develop project structure and core components.
- Develop a CRM Process with dynamic forms and dynamic table using Angular Reactive Forms and datatable.
- Develop reusable and maintainable angular components and modules.
- Implement Server-side pagination and write unit test cases for components.
- Implement lazy loading, code splitting and caching strategies to improve initial load time and reduce bundle size.
- Code Optimization and code refactoring for old components.
- Integrate REST APIs and Reviewed work produced by peer developers.
- Established and led a team for front-end development, fostering collaboration and achieving project goals.
- Attended daily standup with the team to discuss status updates

Senior Software Engineer - VinnCorp, Karachi
